Update to the Telephony Routing over IP (TRIP) IANA Registry Rules  
regarding Postal Addresses

Abstract

This memo updates the IANA registry rules for the Telephony Routing over IP (TRIP) protocol, by no longer requiring that postal addresses be included in contact information.

This memo updates RFC 3219.

Status of This Memo

This is an Internet Standards Track document.

This document is a product of the Internet Engineering Task Force (IETF). It represents the consensus of the IETF community. It has received public review and has been approved for publication by the Internet Engineering Steering Group (IESG). Further information on Internet Standards is available in Section 2 of RFC 7841.

Information about the current status of this document, any errata, and how to provide feedback on it may be obtained at <https://www.rfc-editor.org/info/rfc8602>.

4. Normative References . . . . . 2

Acknowledgements . . . . . 3

Authors' Addresses . . . . . 3

1. Introduction

This memo updates the IANA registry rules for the Telephony Routing over IP (TRIP) protocol, by no longer requiring that postal addresses be included in contact information. No use for the addresses is identified, and omitting this information provides a privacy benefit.

This memo updates RFC 3219.

2. IANA Considerations

This memo updates the registration rules [RFC8126] for TRIP Attributes ([RFC3219], Section 13.2) and TRIP IP Telephony Administrative Domain (ITAD) Numbers ([RFC3219], Section 13.5) as follows.

The IETF no longer requires IANA to collect postal address information when adding TRIP registry entries. Additionally, IANA has removed previously collected postal addresses from the registries.

3. Security Considerations

No security impacts of this change have been identified.

4. Normative References
